

THARUN JATOTH

Full Stack Developer

Hyderabad, India | +91 7981984440 | tharunjatoth620@gmail.com | linkedin.com/in/tharun-jatoth | github.com/TharunJatoth

PROFILE SUMMARY

Full Stack Developer with 2+ years of experience building scalable, production-grade web applications using Next.js, React.js, NestJS, Node.js, and Spring Boot. Skilled in designing secure REST APIs, role-based access control, and payment integrations (Razorpay), with hands-on experience across MongoDB, MySQL, and Linux server deployment (NGINX, aaPanel, SSL/TLS). Proven track record of improving performance, mentoring junior developers, and delivering enterprise platforms end-to-end across frontend, backend, and infrastructure.

PROFESSIONAL EXPERIENCE

Software Engineer — BRV Technologies, Hyderabad

June 2025 – Present

- Developed and maintained Next.js admin dashboards for managing users, vendors, projects, approvals, configurations, and operational workflows.
- Built and enhanced an enterprise interior design and project management platform supporting admin, vendor, and customer roles across multiple business workflows.
- Designed and implemented modular NestJS backend services for project tracking, task scheduling, work orders, vendor management, and internal operations.
- Developed secure REST APIs using Node.js, NestJS, and Spring Boot with modular architecture and role-based access control (RBAC).
- Implemented JWT-based authentication and RBAC to enforce secure access and data isolation across multiple user roles.
- Integrated Razorpay payment workflows supporting booking payments, partial payments, order lifecycle management, and transaction handling.
- Designed and optimized MongoDB and MySQL data models, queries, and API workflows for production applications.
- Managed Linux servers, NGINX, aaPanel, SSL/TLS, and DNS configuration for deployment and production environments; investigated and resolved production/server-level issues within Agile sprints.
- Built an advanced admin dashboard with real-time analytics, role-based access control, and automated workflows, accelerating feature delivery by 25%.
- Implemented performance optimization techniques that reduced application load times by 40%.
- Designed and developed a Garage Management System (Flutter) enabling seamless vehicle tracking, service scheduling, and billing automation.
- Led code review processes and established pull request workflows on Bitbucket to enhance code quality.
- Mentored 2 junior developers and supported onboarding of new team members, increasing team productivity by 20%.
- Collaborated with frontend, backend, and business teams to translate requirements into production-ready features, participating in Agile ceremonies (sprint planning, standups, retrospectives).

Developer Intern — BRV Technologies, Hyderabad

Aug 2024 – June 2025

- Developed responsive web applications using React.js, Next.js, Tailwind CSS, and Material UI.
- Optimized application performance through code splitting, lazy loading, and image optimization.
- Integrated RESTful APIs to deliver dynamic content and seamless user experiences.
- Collaborated with designers, backend developers, and product managers to meet project requirements.
- Used Git and Bitbucket for version control, supporting collaborative development and deployment workflows.

KEY PROJECTS

Enterprise Interior Design & Project Management Platform | Next.js · NestJS · MongoDB · Razorpay · Linux · NGINX

- Delivered end-to-end production features across frontend, backend, database, payment integration, and deployment.
- Built modular APIs and backend services supporting project, vendor, customer, task, work-order, and design management workflows.
- Developed role-based dashboards and workflows for administrators, vendors, and customers.
- Implemented secure payment workflows including booking payments, partial payments, verification, and order lifecycle management.

- Handled production deployments, server configuration, SSL, and NGINX reverse proxy setup, plus ongoing performance tuning.

Full-Stack E-Commerce Application | *Next.js · Node.js · Express.js · MongoDB*

- Built a full-stack e-commerce platform with dedicated admin, vendor, and customer workflows.
- Implemented product, category, inventory, order, user, and vendor management functionality.
- Designed MongoDB schemas and REST APIs for products, users, orders, inventory, and related workflows.
- Implemented JWT authentication, protected routes, role-based authorization, and validation/error handling.
- Developed responsive Next.js interfaces and administrative dashboards for e-commerce operations.

Garage Management System (GMS) | *Java · Spring Boot · MySQL · REST APIs*

- Built REST APIs for vehicle, customer, service, job-order, billing, and workshop management.
- Designed relational database schemas and implemented backend business logic using Spring Boot and MySQL.
- Covered the complete service lifecycle from vehicle intake through job completion and billing.
- Implemented API validation, exception handling, and core business workflows; tested via Postman.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Next.js, React.js, Node.js, NestJS, Spring Boot, Bootstrap, Tailwind CSS, Material UI, HTML5, CSS3

Databases: MySQL, MongoDB

Cloud & Infrastructure: Microsoft Azure (Fundamentals, Administration), Linux Server Administration, NGINX, aaPanel, SSL/TLS, DNS

Payments & Auth: Razorpay Integration, JWT Authentication, Role-Based Access Control (RBAC)

Tools & Practices: Git, GitHub, Bitbucket, Postman, MS Excel, Agile/Scrum, Code Review & PR Workflows

Soft Skills: Collaboration, Mentorship, Problem-Solving, Attention to Detail

EDUCATION

Bachelor of Technology, Computer Science & Engineering

2019 – 2023

Christu Jyothi Institute of Technology and Science | GPA: 7.0

Intermediate (MPC)

2017 – 2019

Sri Gayatri Junior College, Hyderabad | 70%

Secondary School Certificate (SSC)

2016 – 2017

Sri Aurobindo High School | GPA: 8.0

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Future Ready Talent Virtual Internship Program

LEADERSHIP & ACTIVITIES

- Project Lead: Directed a team in designing a "Fall Detection" system to classify fall vs. non-fall actions.
- Research & Development Club Convenor: Organized technical events and mentored juniors.
